

PMI Chart

A PMI is an effective reflection tool to allow students to look at the whole picture of an event. It allows you to look at the positives, the minuses and what are some interesting factors. You could use a PMI individually, with a partner, small groups or in whole class discussions. This procedure could be implemented after Literacy Teams, after playing team games, after reading an information book or at the end of an integrated topic

| Plus | Minus | Interesting |
